

Fundación  
Starlight

## CERTIFICATION

After the evaluation, the Starlight Foundation has awarded the qualification of:

### **“GAL HASSIN ASTRONOMICAL CENTER” “STARLIGHT STELLAR PARK”**

This place is therefore included in the list of Starlight sites as a “Stellar Park”.

**Starlight Stellar Park** is a qualification to places generally belonging to municipalities that protect its night sky enough to allow observational, educational, cultural or recreational activities linked to astronomical events (passing comets, eclipses of the sun and moon, planet alignments, meteor showers, etc.).

Usually, amateur astronomers can find facilities for observation in a Stellar Park.

This certification is value until 31st december 2021. You can renovate the certificate in the 20 first days of january 2022.

The award of the Certificate represents a commitment and the commencement of a period of ongoing improvement of different aspects, both as regards the quality and coherence of the tourist product, and aspects related to the need to preserve and improve the quality of the night skies and the protection of the resources of the Stellar Park.
